

Neighbourhood Plan

Your neighbourhood; your future

KEY THEME 4 - SUSTAINABLE COMMUNITY

Your Views - What do you think?

POSSIBLE ISSUES TO CONSIDER

1. To seek **specialist** advice if required, such as transport advice.
2. To **review** parking provision, in both existing and potential new developments, to ensure adequate availability and safe access.
3. To endeavour to **identify and address** parking concerns at key locations in our village.
4. To identify possible sites for **new footpaths/cycleways** in the village, including new developments, that might potentially contribute to a reduction in the number of vehicles.
5. To review **existing signage** and the scope for signposting alternative routes to **reduce** the number of vehicles unnecessarily transiting the village
6. To investigate the scope for improvements to **mobile phone signals** and **broadband speeds**.

Are there other issues that need to be considered? Is speeding an issue? Do people park inconsiderately in your part of the village? Do you have any views on practical and enforceable ways of addressing such issues?

Are existing footpath standards adequate? Does scope exist to improve the provision of footpaths and cycle priority? Is the existing signage in the village adequate?
