

Neighbourhood Plan

Your neighbourhood; your future

KEY THEME 5 - HOUSING

Your Views - What do you think?

POSSIBLE ISSUES TO CONSIDER

1. To support the **assessment of local housing needs** that has been commissioned to establish the type and amount of new housing that would help meet the current and future demands of the Parish.
2. To carry out a robust assessment of the **suitability of potential sites** in the light of the identification of any local housing need.
3. To **engage** with the Parish and landowners to ascertain their views and plans in relation to potential sites for development.
4. To ensure **quality design and building standards** for new developments.
5. To ensure that transport infrastructure relating to proposed development sites **minimises unnecessary traffic flow** through the village and maximises the use of existing linkages, and
6. To determine appropriate actions to ensure that key **heritage assets** are identified, protected and enhanced.

What do you think? What type of housing is required? Where should development take place?

**Which buildings should be protected?
Do you have a view on design & building standards?**
